

RESIN BASED DECORATIVE FLOORING

Coloured Quartz Flooring

Coloured Quartz Flooring is a two component, seamless 100% solids clear epoxy flooring / floor resurfacing system with High Chemical Resistance. The epoxy may be applied as a coating, or combined with silica sand or multi-coloured quartz aggregate to produce a durable, easy to maintain floor, on both new and old surfaces. Although Quartz Flooring is primarily used as flooring and mortar resin, it is one of the most versatile products; it is also commonly used for resealing epoxy bonded stone, to seal acid stained floors and as a carbon composite and fibreglass layup resin.

Benefits

- Low odour
- Chemical resistant
- Strong and resilient
- Non-slip to smooth finishes
- Abrasion resistant
- Zero VOC's ZERO VOCs
- Meets standard for food handling applications

Applications

- Aisle Ways
- Assembly Plants
- Bakeries
- Basement Floors
- Bottling Plants
- Break Rooms
- Cafeterias
- Canning Plants
- Car Washes
- Cells
- Chemical Storage
- Chemical Processing
- Church Floors
- Loading docks
- Locker Rooms
- Machine Shops
- Manufacturing
- Marine Surfaces
- Meat Preparation
- Mortuaries · Classroom Floors
- Corridors
